

In order to reinforce our R&D department, we are looking for a:

Software Developer

YOUR MISSION

Sensometrix biometric solution involves perfect quality in terms of installation, performances and management. For that purpose, we are looking for a software developer, who will have as a mission to develop solutions, graphical user interfaces and integration modules and also to support customers, partners and sales. Moreover, she or he should be familiar with the domain of logical security and comfortable with embedded systems.

YOUR PERSONALITY / ARE YOU?

- A great and passionate programmer?
- Looking for an entrepreneurship experience into a start-up with a global potential?
- Interested in thinking and developing the next generation of biometric solutions?
- Excited by the idea of making Sensometrix a leader in the domain of biometric technologies?
- Attracted by the opportunity to work among talented people in the fields of IT and security?

YOUR SKILLS

You have deep knowledge in designing and developing application in C/C++ under Linux/Unix (3 years of experience) and good knowledge of development under Windows, then you fit to the targeted profile.

Good knowledge and experience in:

- Security: OpenSSL, GnuTLS, RSA, AES, etc.
- Protocoles TCP/IP, RS232
- Database: SQL language, Relational-Entity scheme
- Web programming: PHP + JavaScript
- Graphical interface: QT, SDL

A plus:

- Knowledge of Java, C#, bash and Perl
- Knowledge of Biometry and Access Control

SENSOMETRIX IS WELCOMING TALENTS

Innovation is the engine of the industry. That's why, at Sensometrix, we are looking for talented profiles who will play a major role in the development of the technologies of the future. If you have a strong entrepreneurial spirit and you want to take in the development of a high potential start-up, please send an application to hr@sensometrix.ch.
