Executive MBA Program winners: Aleva Neurotherapeutics, iTaste.com, greenTeg, mixin, Motilis, NanoPowers, Sensometrix

Fulltime MBA Program winners: AgoraBee, Bacula Systems, Bulane, cashare, Deutsche Derivate AG Microfinance, JMC Lutherie, KeyLemon, LogiFleet, NetGuardians, PearlTec, Performance Buildings, PrimeEqual, Primus Solar, Quensis, Zürich Instruments

Aleva Neurotherapeutics : We are a Medical Device spin-off of the EPFL developing unique neurostimulation methods for treating neurodegenerative diseases

AgoraBee : AgoraBee provides a complete platform for location-aware active RFID (Radio-frequency Identification) and WSN (Wireless Sensor Network).

Bacula Systems : Bacula Systems provides enterprise quality services and support for open source network backup and recovery software.

Bulane: Through Watalys, Bulane can provide chlorinated water to people in the developing world who do not have direct access to potable water.

cashare : Cashare runs an Internet loan platform for individuals to borrow and lend in a safe and easy environment with fair interest rates

Deutsche Derivate AG Microfinance : Microfinance institutions (MFIs) provide microcredits to entrepreneurs in developing countries. Deutsche Derivate AG Microfinance is a refinancing institute for MFIs which do not have easy access to the capital markets.

iTaste.com : iTaste makes choosing a restaurant fun and dynamic. Based on Facebook logic, you participate to a community of friends keeping you at pace with the best addresses in town. This is second generation Web2.0 applied to mobiles, it's always available, it's interactive, it's relevant and fun.

greenTeg: Development and production of cost effective devices for the utilization of waste heat to generate electric power by means of micro thermoelectric generators (TEG).

JMC Lutherie: JMC Lutherie offers a new generation loudspeaker system, built like a musical instrument, which allows the listener to feel all dimensions of music.

KeyLemon: KeyLemon is a software company which offers simple, fast and convenient computer access solutions, based on face and speech recognition, for all internet users.

LogiFleet: LogiFleet develops, integrates and commercializes integrated solutions for GPS geolocalisation and mobile services tracking.

mixin: mixin helps you and your friends to choose, plan and share things to do

Motilis : Motilis is a medical equipment start-up company specialized in gastroenterology with an innovative pill technology.

NanoPowers: NanoPowers is a medical device company focusing with its proprietary artificial muscle technology on treatment of severe urinary and fecal incontinence.

NetGuardians: NetGuardians provides a Security information event management solution for IT governance to medium and large companies

PearlTec: Pearltec develops novel fixation devices to make medical scanning faster, easier and more comfortable

Performance Buildings: Solutions for managing visitor access and shared meeting rooms in corporate as well as public settings.

PrimeEqual: Based on the award winning Preciquant Dental Anaesthesia system, Primequal is developing a version of its injector suitable Botox injections.

Primus Solar: Primus.Solar intends to launch in a Gulf country a large fully integrated manufacturing plant for photovoltaic products, from silicon ingots to solar modules.

Quensis: Quensis embodies the future of naming: our unique and revolutionary technology fuses into one streamlined process the complex legal verifications and the creative development. We create names that are legally available.

Sensometrix: Sensometrix provides biometric identification solutions that bring a high added value by combining ease.

Zürich Instruments: Zurich Instruments is an ETH spinoff developing and selling high-tech instrumentation on the global market.
